Welcome...

Can you feel the excitement? You know how when your favorite hockey team is absolutely atrocious for years on end , and your just about to give up on them when you realize they got 5 straight 1st overall draft picks in the line-up and your about to embark on some pretty phenomenal years ahead? Suddenly you can't find a ticket at any price. Even though you start the year 0 for 4 you still have hope. Well, this may be a stretch, but that's what I liken the cattle industry to. We are about to embark on some pretty phenomenal years ahead. We might start 2010 off with a 0 for 4 record, but we definitely have the makings of a good future. Corny eh? Well it gets worse. Your gonna wanna get

your tickets early , or they may be tough to find in a few years. By tickets I mean good breeding stock. Good bulls, good cows , good replacement heifers , they'll all be in high demand when the turnaround comes. The cows bred this spring are going to produce the calves that are going to sell in the heat of the upswing. I'm not just saying this because I want you to buy our bulls come March 26th (although, it's up there in my reasons) but we ourselves have kept back more commercial replacements than we ever have at any time. We're banking on it. Literally.

March 26th will mark are 4th annual sale here in Taber. The set of bulls this year is right on pace with how we like to see them managed. They came off grass slightly above average, and are gaining right above 3 lbs a day on test. They've got the condition needed to display their growth, while not carrying too much to hinder their athleticism. These bulls will breed. Guaranteed. If not, we'll get you one that does. Guaranteed.

Rod Wendorff is once again contributing a strong set of Black Angus virgin 2 year olds for the sale. Rod calves later and offers no bulls for sale as yearlings. His bulls are big and strong and will definitely fill the need.

We'd like to thank all our past customers who have supported us and we look forward to the new ones we're sure to meet again this year. Whether in the market for a new bull or just needing an afternoon off the farm, please stop in on the 26th and join us for a pop or 2ish, a bite to eat, and a chance to BS with fellow cattlemen.

Ben & Carol Tams

GENERAL INFORMATION

Auctioneer: Bob Perlich 1-403-329-3101

Blockman: Rob Holowaychuck 1-780-916-2628

We guarantee satisfaction on sight unseen purchases. Please call any of the above numbers for help.

Insurance: Insurance will be available sale day. Any bulls going back with us we strongly recommend insuring.

Delivery: Free Delivery throughout western Canada. We ask that you please work with us on dates and other possible deliveries in your area. Leave your bull with us, we'll deliver them when you need them. \$100.00 off per bull if you take them home sale day.

Individual Bull Data:
Ultrasound data, scrotal measurements and semen test sheets will be available sale day.

Terms: Terms of the sale are cash or cheque at par made payable to Perlich Bros., unless prior arrangements have been made.

Breeders Guarantee:

All bulls are guaranteed breeders. Thistle Ridge Ranch stands behind every bull.

Liability: Any liability of the bull is restricted to the purchase price of that bull. If any problems arise, please contact us as soon as possible. Everyone who attends the sale, does so at their own risk.

EPD's: Please note that the EPD's may change from the time the catalogue is printed until the registration papers are transferred.

Announcements:

Announcements sale day take precedence over the printed material.

Accommodations:

Heritage Inn, Taber 1-403-223-4434
Super 8, Taber 1-403-223-8181

Pre Sale Viewing:

Bulls can be viewed at Sandy Hill Stock Farms until Wednesday, March 24. (7 miles east of Taber on Hwy #3, 2 miles north, 1/4 mile west.) To view Windy Ridge bulls contact Rod for directions. After March 25 they will be on display at the Taber Agriplex.

Ultrasound Data:

All yearling bulls have been CUP ultrasounded and data will be available sale day on a supplement sheet.

Welcome from OBI....

It's OBI's pleasure to once again be working with Ben and Carol on their bull sale.

If you've been in the Red Angus breed a while you'll realize how tough it can be to find genetics that really set you apart from the rest of the field. With this in mind, Ben has stepped out and marched to his own drum (some say he's been doing that for years) in his quest for fresh exciting genetics for his program. The purchase of HF Prairie Smoke 124T, a son of the breed giant "Kodiak", was truly a move that sets the Thistle Ridge program apart. Volumes could be written about the achievements of Kodiak and his progeny, but there are two things in my mind that really stand out. At the World Angus Forum this past summer, Kodiak was named the Premier Sire of the Black Angus show, and at the 2010 National Western Stock Show in Denver, a pen of 3 Kodiak sons from Soo Line won the black pen show, the 1st time in history that a Canadian Pen has been champion. What an opportunity for you as Red Angus breeders to add these genetics to your program, either with a Red or a Black/Red carrier herdsire.

Wendy Ridge is offering a strong set of virgin 2 year olds for your selection today. The Wendy Ridge program is one which utilizes a combination of carcass values collected through ultrasound and the functionality of the Angus breed. The Bulls offered are sound, and athletic and are sure to get your cows covered.

As much information as possible will be supplied in the catalogue to aid you in your selections. Ben and Rod would be more than happy to visit with you should you have any questions.

If Ben or Rod, any of the Perlich crew, or us at OBI can be of any assistance we are just a phone call away.

See you in Taber on the 26th.

On behalf of OBI, Bob Toner

Magnetic is an outcross bull out of one of our foundation cows. We used him on some select heifers in 2008 and really like the thickness he can add without sacrificing birth weight. His 1st heifer calf offered (a red one) sold to Mike Hein of Valley, Nebraska.

We used him again in 2009 on some cows so look for more progeny from him in next years sale.

6037 has an absolutely rock solid maternal pedigree. He's an ET calf from the famous Prairie Lane 2060 cow of Soo Line's . We needed him as a clean-up bull and the touch of outcross and that maternal punch fit the bill for what we were looking for . Check out his herd bull candidate for a son in lot # 35.

Still one of the most consistent bulls in the industry for producing powerful bull calves and " cowy " females. The 3 bulls in the sale are all natural bred from this 11 year old breeding machine. Last year we ran Wanted with the commercials . It was probably his last natural breeding season as he's starting to show some age.

"Pudge" is everything we thought he'd be. The amount of muscle and red meat he puts in his calves is among the best the breed has to offer. His calves consistently have big rib eyes, way above average marbling, and below average fat. Any one whose ever read a yield and grade sheet from a pen of fats knows those are traits that will make you money.

It doesn't end there with "Pudge". His daughters raised their 1st calf crop last year and were standouts. We used a son of "Pudge" out of a Wanted daughter called "Hidalgo"

For a taste of Hidalgo see lot # 10. There'll be more of them next year.

The year Sakic sold to Genex, Dan Sewall and I were all prepared to go down there and take a run at owning the bull. Well Genex had a little deeper pockets that day and lucky for us his semen (Sakic's) was available and we decided it was a no brainer. His dam is one of the deeper made gems to be found in the breed. The Sakic calves are going to have a good mix of performance and maternal qualities. You'll see more of his calves down the road from us.

It's hard to describe where this bull is going to lead us. So far he's been pretty good. Real good. I'm not one to claim a bull is awesome all around for quite a few years, but I gotta tell you this guys making me want to brag. He's calving very easy, and that's always one of the 1st steps. His calves are above average for weaning and yearling weights. His 1st carcass test on his calves comes back above average. Feet and udders are not going to be an issue, his lineage and he himself are excellent. To add the outcross genetics of his sire "Kodiac", one of the all time best breeding bulls the breed has seen to date, over onto the red side is something we're tremendously excited about. Based on what we've seen so far from Prairie Smoke, I think he's a bull you can't go wrong with

Welcome to the Thistle Ridge Ranch Red & Black Angus Bull Sale!

The Perlich family and staff are once again proud to participate in this year's 4th Annual Thistle Ridge Ranch Bull Sale. Ben & Carol Tams put a lot of effort ALL year into their herd and it is evident in this year's group of bulls. Thistle Ridge Ranch has a strong reputation for productivity and performance in their bulls. Customer satisfaction is a "must" in their herd program, you won't be disappointed! It is always a pleasure to work with Ben & Carol, and we look forward to selling you top quality Angus Bulls at this year's sale!

This guy is not meant for everyone. He's got enough performance packed into him, it's just in a smaller frame package that probably won't work if your cow herd is moderate already. Now, if you want to down size some larger simmie or limo cross cows he would be your answer.

Sometimes the names I pick just don't sound as good later on. Oh Well. Baloo is a prime example of our program. His sire, Hidalgo, sold to 40 Mile Grazing in our 2008 sale. Hidalgo had our # 1 rib eye and # 1 marbling measurements that year, all with below average fat. Well looky here. Baloo boast a 64.6% lean meat yield, he's indexed # 1 for rib eye, and # 3 for marbling, all with well below fat #s. Hidalgo, Pudge, Red Mile, Knighthawk and Wanted. This is where we want to be.

Prairie Wolf will get some attention. The 124T calves are very uniform in their make-up. To be able to add the outcross genetics of HF Kodiak 5R onto these red bulls is a big step in giving a larger gene pool to draw from. In saying so, we couldn't have picked a better bull to do that with than Kodiak. He could possibly be the truest pure breeding bull the entire Angus breed has seen for years, if not ever. Keep daughters if you can. They will be special. **Retaining an in-herd semen interest.**

One of only 3 Wanted bulls in this years sale. Good footed bull that will go out and breed some cows.

Semen Interests....

The bulls that are marked as keeping an in-herd semen interest means that Thistle Ridge, and Thistle Ridge alone, would like to draw semen on those bulls at their costs, and the buyers convenience, to be used solely in the Thistle Ridge herd.

Bulls marked as a full 1/2 semen interest means that Thistle Ridge wishes to retain semen either for in herd use, or for sale as half ownership. Full possession of the bulls goes to the buyer. Any costs associated with drawing semen, other than if Thistle Ridge draws for in-herd use only, will be shared equally.

Larger framed calving ease bull from our most fertile cow family that stems back to the Elliotts of Waterview Red Angus. It's very rare for any of their kind not to calve in the 1st 3 weeks of calving. The S A V cattle in the states are on a real tear right now. Add that to the consistency of the Lynn line and it should be a good mix.

Another red outcross Kodiak grandson. Excellent marbling data coming back from the 124T calves. This guys AAA and he comes from a beautiful uddered 2 year old out of the Rod Lorenz herd. Build a cowherd with these Prairie Smoke bulls.

THISTLE RANCH YEARLING BULLS

A few theories on...

Grain. It's not a swear word.

Over the last few years we're beginning to see a big rise in the number of "Forage Tested" bulls available for market. I think that's just fine. If we had the space and grass we might consider it an option for our operation. What I find weird though is that a lot of the reasons these bulls are claimed to be superior is the absence of any form of grain in their diet. Huh? We feed our bulls a silage based ration which contains approximately 10% grain. We shoot for them to gain 3 lbs a day so we can establish which bulls have the ability to perform. Contrary to some beliefs, a low amount of grain like that does not hurt your cattle. Not even the least bit. Sure, back the feed truck up and start pouring it to them and you'll have all sorts of grief from shot livers to wrecked feet. But to place all the blame on the evils of grain is just nonsense. Common sense says that a little moderation will not only save you money (cost of gain goes down with the addition of grain), but will also help get some needed condition on your bulls to prepare them for the rigors of the breeding season. There is an entire industry in the south here built on grain not fit for human consumption. It's called a feedlot. Don't forget that they're the ones bidding on your calves every fall. Like it or not, they don't care so much whether your calves can live without grain. They want to know if your calves will grow when pushed. Until something else happens there, the customer is still always right.

You've got to get in behind this guy to really appreciate the square back end on this total outcross chunk. He's another red Kodiak grandson who's adjusted weaning weight came in at 779 lbs out of a S A V Initiative 4406 X Rambo 502 X Pathy 62A dam. He's got AAA marbling with his % IMF over 7. The other bulls rode him a little bit in November/December and it affected his yearling performance. **Retaining an in-herd semen interest.**

A lesson in marketing....

My brother-in-law is a marketing guru and he was telling me how he closed a big deal he was working on once. He was to meet two very important businessmen at the New York airport early on in his career. He was a little nervous so he stopped at a lounge for a quick drink. While there he saw Bill Gates walk in. He took a chance and approached him for a favor. "Mr. Gates, you don't know me, but I have a huge meeting with some very influential people here in a few minutes. If it's not too much to ask, could you just come over and say "Hi Byron, how are you doing?". Well the meeting was going on, and sure enough Bill Gates show up and says "Hi Byron, how's it going? Long time no see". To which my brother-in-law answered, "Get lost Gates, I'm in a meeting!"

Another different outcross pedigree to check out. The sire, 6230S, is a red gene carrier bull we bought from Crowfoot to use as a clean-up on some cows. We ended up not getting very many calves from him before we lost him, so there won't be much to compare 522W with. Don't know as I would use him on heifers.

THISTLE RANCH RIDGE YEARLING BULLS

This guy got his name because I actually thought he was sired by the 6230S bull until just recently. Turns out he's a H0904 6037 son instead. That ain't all bad. The dam of 6037 is a spectacular cow, and line that up with 526W's powerful " Fargo " dam, you've got a female producing machine. One of the top gainers on test, he'll make an excellent herd bull.

531W and 532W are twins that I had to DNA to get the actual sire on, that's why the names might seem a little out there. Seeing as the Wife decided to have the last youngin right smack in the middle of AI season, I thought it would be wise to run all the bulls together towards the end, and just DNA to find the sire. Might not want to do that again. Pretty decent cow bull here nonetheless.

O.K. let me explain. The dam, 2H, was also in the multi-bull pasture that year. When we DNA tested the calves, turns out one twin was a Wanted, the other a Prairie Smoke. Totally possible. Although quite similar, I would have no problem using the 124T bull on heifers, while the Wanted should stick to cows. Neat set of calves. **Retaining in- herd semen interest.**

Typical Pudge calf to finish off the yearlings with. They are just flat-out good money making commercial bulls that the industry needs. Take advantage of them, they won't disappoint.

I like this bull so much that I tried to think what Ben would say if this bull was his and then I realized that we have to keep the page #s under 100 pages. 1U is sired by the great Durango bull from Beverly Hills and the dam is an Iceberg from Eastondale Angus. This bull will add thickness, depth, and length and on top of this he should be safe to use on heifers.

19P always brings home the heaviest bull calf come weaning time. Just like his full brother, who sold to K. Palmer Farms last year, 6U is a big soggy kind of bull that will add depth and carcass to his offspring. Probably not a good choice for heifers.

13U has a little more frame than the other bulls we are offering and just as much muscle. He will work really good on the typical British breed cows as well as heifers.
